(streetscapes) 1,4-12B (exterior) 20, 25, 28, 33, 35, 36, 39, 43, 50 (representative interior) Property Name: Gillis House

Address: Old Route 18, Stevensville, Maryland

Owner Namer/Taxpayer I.D. Number: Stevensville Towne Lim. Partnership/52-146-2339

Description:

The Gillis House, facing south on Old Route 18 in a residential section of Stevensville, is a two-story frame, gable-roofed residence with a two-story, two-bay, gable roofed rear ell on the north elevation. The building is sheathed with round-butted wood shingles and has a standing seam metal roof. The existing wood shingles date at least to 1906 where they are evidenced in an historic photo (photo #17). Shortly after acquiring the building, the present owner removed the mid-20th century asbestos shingle siding. Please refer to photos #12A and 12B which illustrate this former appearance.

The overall condition of the building is fair due to the sagging central core of the house at the rear of the center hall; lack of maintenance during recent years as a rental house; damage (possibly structural) at the roof line of a former full-length porch on the front (south) facade which has been removed by a previous owner; and removal of the window heads, an area now patched with thin sheets of metal.

The main block of the building is on an east-west axis situated close to the narrow road, facing other residences also from the last quarter of the 19th century. The south elevation has an off-center entrance with a replacement stoop and gabled porch and asymetrically placed window openings on the ground floor, with four windows on the second floor. An historic photograph, dated 1906, shows a plain full-length porch on the front elevation. The west elevation has two symetrically placed window openings on each floor flanking a later 20th century buff brick exterior chimney. The rear ell ties directly into the main block and has two window openings on the second floor and a shed roof porch with latticed siding. The north elevation consists of two bays of the rear ell and two additional window openings. On the north and east elevations of the ell are enclosed, frame sheds which are later additions. Various window openings have been reworked. The east elevation has no window openings except for two small lights in the gable end. Windows are 2/2 sash on the main facades and 2/2, 6/6 and 1/1 on the rear (north) facade. There are two interior chimneys, one in the main block and one in the rear ell.

The front entry opens into a center hall which provides access to the two rooms on the ground floor of the main block and access at the rear to the ell which consists of one large room -- a kitchen and a breakfast room totally refinished with the contemporary material as well as a half-bath installed in the shed addition attached to the east elevation of the ell. The second floor is divided into three rooms in the main block and one room and a full bath in the rear ell.

Only the main block and second floor of the rear ell contain surviving historic features: the plain window and door trim; doors; wood floors. Added closets and a bath are recent alterations to the second floor rooms. The plaster walls are in fair condition. The main feature of the east room on the first floor is an historic mantelpiece; the entrance from the hall into this room represents a circa 1920 alteration. There are no other significant finishes or character defining features in these spaces. The previous use of this building has been residential rental.

Property Name: Gillis House

Address: Old Route 18, Stevensville, Maryland

Owner Namer/Taxpayer I.D. Number: Stevensville Towne Lim. Partnership/52-146-2339

Page 2

Siginificance:

The Gillis House contributes to the significance of the Stevensville Historic District in its location, design, setting, materials and association. Its contribution has been enhanced by the removal of the non-historic siding which reveals the original wood shingles. In its frame construction, orientation to the road and vernacular feeling, it is similar to its neighboring residences on the street, all of which date from the second half of the 19th century. The building demonstrates the typical residential architecture of the southern section of the district, i.e. "I" houses of the 1875-1900 period set close to the streets on small lots. The building is listed as a contributing building in the National Register nomination, Item 7, page 8, parcel 120.
